News Release

Flutter Damper Product Line Introduced by Aerospace Turbine Rotables, Inc.

Wichita, KS, February 7, 2018 – Aerospace Turbine Rotables, Inc. (AeTR), a wholly owned subsidiary of First Aviation Services Inc., announces its entry into the Flutter Damper product line. AeTR provides detailed inspection, repair, and overhaul services for many hydraulic dampers, including those used in Bombardier’s Challenger family. AeTR’s specialized test equipment enables the company to service, troubleshoot, repair, overhaul and test flutter dampers in accordance with published maintenance requirements. Dave Seavey, AeTR General Manager said “We saw a big gap in the market between firms that could inspect Flutter Dampers and those that could actually provide the full service of repair and overhaul. The product line has been very well received and we have plans to expand it further.”

About Aerospace Turbine Rotables, Inc. (www.turbinerotables.com)

Aerospace Turbine Rotables, Inc., a subsidiary of First Aviation Services Inc., has over 40 years’ experience as a FAA and EASA certified repair station in the repair and overhaul of various aircraft system components, primarily serving the corporate, paramilitary and military markets.
