Lear 45 Landing Gear Capability Announced by Aerospace Turbine Rotables, Inc.

Wichita, KS, March 31, 2015 – Aerospace Turbine Rotables, Inc. (AeTR), a wholly owned subsidiary of First Aviation Services Inc., announces that it has received FAA certification to perform major inspections and overhauls on the main and nose landing gear for the Bombardier Lear 45.

The Lear 45 capability adds to AeTR's existing expertise in King Air, Beechjet, Premier, Gulfstream, Challenger, T-6 Texan II, Global Express, Pilatus, Citation, Twin Commander, Fairchild and Piper. AeTR is a recognized leader in the repair and overhaul of landing gear for some of the world's most popular FAA certified aircraft in corporate and military applications.

"We are really proud to be the first independent MRO to support the Bombardier Lear 45. This is a popular and growing market and fits perfectly with our current customer base." says Dave

Seavey, Vice President and General Manager of AeTR. "We have our own cores and have also been working with third parties to expand the exchange core pool for our customers."
